Programmers Required

We require 2 programmers to work on a casual basis (with the prospect of full-time down the track).

**Position 1:** Involves assisting in the development of PC-based game/training software programmed in Java. The main focus would be to (a) develop additional games (full specifications provided), and (b) enhance the look and feel of the software (so some visual/gaming experience would be nice).

**Position 2:** Involves developing a PC-based data display and analysis tool. Full specifications will be provided. Some signal processing experience would be useful.

For both positions, we require someone ASAP, for approximately 20 hours/week minimum. Hourly rate is negotiable.

For further information, please contact Dr. Stuart Johnstone on 0412 716 887 or sjohnsto@uow.edu.au
